What's New in the Digital Frequency Visualizer?

The digital frequency visualizer application samples data at 22 kHz Stereo and displays up to 5 times a second the frequency components in a logarithmic scale. Once started it tries to open your sound source. If you are playing a wave - please make sure this is at 22 kHz. Playing cd or line-in is always fine. If you have multiple sound cards you may select one. Note: with a 5 min delay... Digital Filter or Equalizer You can use the digital filter or equalizer to enhance the sound you are recording or play. The equalizer controls are sliders. You can access the equalizer by clicking the menu button in the Toolbar and selecting Equalizer or Filters . You will be taken to a menu where you can select the equalizer settings. You can also add effects like noise suppression, de-emphasis, equalization, etc. Next Up To &
