In January 2014, Autodesk introduced a Windows 10 64-bit version of AutoCAD. Software features Input methods In addition to a mouse, the standard input device for

drawing, drawing can be created and edited with the pencil, eraser, paper space, and various shapes such as circle, square, line, arc, and 3D shapes like cube, cylinder, cone, and prism. Pencil: provides a thin point,

which can be moved around and erased by dragging. Eraser: provides a larger eraser, which can be used to erase both pencil and pen marks. Paper space: provides a virtual workspace in which drawing can be

made on a piece of paper. 2D shapes: allows creation of 2D shapes such as rectangle, polygon, and circle. 3D shapes: allows creation of 3D shapes such as cube, cylinder, cone, prism, and torus. 3D

modelling: allows creation of 3D models such as a tree, a plane, and a cube. Control modes In addition to editing or drawing, a CAD program may offer a number of control modes: Move: allows you to change

the position of an object in the drawing space. Rotate: allows you to change the orientation of an object in the drawing space. Group: allows you to combine multiple objects into a single group. The selected

object is grouped together and the objects within the group become inactive.

Translate: allows you to move an object in the drawing space along a specified axis.

Scale: allows you to resize an object in the

drawing space along a specified axis. Rotation control: allows you to rotate an object in the drawing space around a selected axis. Mirror: allows you to flip an object in the drawing space vertically or horizontally. Object

snap: enables you to snap an object to the grid and track. Draft view: enables you to look at the drawing from an overhead perspective. Palettes: provides a series of palettes that can be accessed to select or

apply a particular tool, e.g. the Dimensioning Tool (Dim), the Snap tool (Snap), etc.

Modify: provides a series of features for editing an object.

These include stretch, shrink, rotate, extrude, align, slide, rotate,

mirror, rotate, flip,
scale, and polygonize.
Draw tools: allows you

AutoCAD Henri Laurens
amuses friends with
new comments about
plastic surgery Henri
Laurens makes it clear
that he is a proud
owner of a double chin

and does not wish to escape the fact. The 43-year-old actor, who is best known for playing Benjamin Crog on The Young and the Restless and Ava Moore on All My Children, was quoted by Hollywood Life

magazine. Laurens made the comment when asked what it is about plastic surgery that he loves. "Nothing really, I guess I'm just one of those old fashioned people, because I like the results that one gets,"

he shared. The actor also revealed that he has yet to have plastic surgery, but plans to get his chin "surgically" reduced soon. "I don't plan on having anything done to my face yet, I'm not a big fan of plastic surgery in

general," he admitted. Laurens and wife Kristen are parents to a three-year-old daughter called Rima and he has previously spoken about his struggles with his voice. The star has said that he still struggles

with being called by his real name which is Henri and can understand why some might feel that a man should not have a 'girl' name. "I'm not shy about it and I haven't found a reason why I should be, but I can

understand why some people might feel that way. I've lived my entire life as a man but I've always been Henri or Henri. So, to change it now is a little weird," he said. "It's a tiny little thing but I get it. I don't know if I'd ever

really want to change
my name, but yeah, I
guess I could change it
if I felt like it, I could
probably have Henri
change it ca3bfb1094
