In recent years, along with the development of semiconductor fabrication technologies, an integrated circuit is becoming finer and a multilayer structure is becoming higher. In order to deal with a method for carrying out a circuit using a fine pattern and a high-molecular compound, a three-dimensional transfer molding method has been proposed which is capable of high-precision transfer molding of a highly precise microfabricated circuit at low cost (see Non-Patent Document 1). Non-Patent Document 1: Key Technologies 2015; December issue, pp. 56-57 By the way, in the three-dimensional transfer molding method, when a substrate of a high-molecular

compound is introduced into a mold by a robot arm, a crack may occur in a resin at a sticking portion, and there is a possibility that the above-mentioned problem is caused. On the other hand, in recent years, a method for producing a metallic electrode by a process of forming a metallic nanoparticle layer by a sputtering process or a vacuum evaporation process to form a metallic film, applying the film to a substrate by the above-mentioned pattern etching process, and thereafter applying a plating process to the substrate has been developed (see Patent Documents 1 and 2). In this method, the application of a fine patterning process to a resin substrate has been adopted in order to apply a fine metallic nanoparticle layer onto the substrate. As a result, in addition to the advantage of a high-resolution patterning process, a higher productivity is obtained by a patterning process which is inexpensive. Spartant, pestaful, ispitatea sa. Avem, de fapt, imunitate. Înainte devesa se întâmpla ceva disperat, ceva de la o propoziție jignitoare sau de la un discurs bășesc. După, după, ultimul nostru senator i-a tăiat sforile, s-a închis și a ieșit să strige și să râde. Așa că, mi se pare, toți știm cum ar fi în cazul său. Poate că are o veșnică relație cu televizorul. Nu i se plătește nici măcar torentul lui. Să
